

## Рубежный контроль №2 по курсу БКИТ

**Классы:** «Браузер» - «Компьютер»

### Запросы:

1. «Браузер» и «Компьютер» связаны соотношением один-ко-многим. Выведите список всех браузеров, название компании-производителя которых заканчивается на «х», и названия компьютеров на которых их можно поставить.
2. «Браузер» и «Компьютер» связаны соотношением один-ко-многим. Выведите список компьютеров со средним значением количества баллов по безопасности браузеров на каждом компьютере, отсортированный по среднему значению количества баллов.
3. «Браузер» и «Компьютер» связаны соотношением многие-ко-многим. Выведите список всех компьютеров, у которых название начинается с буквы «S», и список браузеров, которые на них можно поставить.
